👤 CLASSIFIEDS

THE TOPAZ CONCEPT:

The Topaz is backed by 30 years of off-road product development combined with class leading manufacturing techniques and materials. The chassis is hot dipped galvanised and the body is made from galvanised steel and aluminium panelling which is riveted together to ensure strength and durability, making this the best Topaz yet.

The Topaz shares the same off-road 'DNA' as its predecessors with several improvements. These include refined electrics, shaped leather

couches, internally accessible portable toilet, fully convertible king size bed option, sliding glass windows and more fridge capacity.

The principal features of the Topaz are standard inclusions across all models. These include quick kitchen access via the full height door, durable all metal kitchen with precision slide out drawers and the space creating pop top. Pair this with the dynamically styled body and you have a premium product that is truly set apart from the rest.

All other specifications, enhancements and accessories are up to you. The extensive options list allows you to customise your Topaz to match your tow vehicle's capabilities, your camping preferences and your budget.

The models are identifiable by their highlighted colours; Eyre (red), Savannah Gas (black), Savannah Diesel (silver) and Silverton(wineberry).

Simply select the Topaz model that best suits your needs, add your options and you are on your way.

 [Topaz Overview](#)

Camper Trailer of the Year Judge Michael Borg summed up the Topaz:

“At the end of the day, this is a camper that’s designed to be super comfortable, yet still be a camping trailer. After taking a close look, I reckon Track Trailer has really hit the nail on the head. Sure, it’s a bit agricultural looking, but anyone with half a brain can work out that it’s really built for a purpose not just to look pretty! It really is a great combination of comfort, practicality and bush-ability.

So if you’re not one to compromise on comfort, but still

want the true-blue camping and touring lifestyle experience, this camper is really worth a closer look.”

STANDARD FEATURES OF THE TOPAZ HYBRID INCLUDE:
